Summary

Curious and highly motivated Computer Science student and aspiring software developer with a strong passion for backend development, Linux systems, and open source ecosystems. Actively building scalable applications, developer tools, and real world systems while contributing to open source projects. Strong problem solving mindset with focus on performance, reliability, and clean code.

Education

Agni College of Technology
B.E. Computer Science Engineering

Sept 2023 – 2027

- CGPA: 7.96

Technical Skills

- **Languages:** C++, Go, Swift, SQL, HTML, CSS, TypeScript, Python
- **Frameworks:** Boost, Express.js, NestJS
- **Databases:** Redis, PostgreSQL
- **Developer Tools:** CLion, VS Code, Git, GitHub, Postman
- **AI-Assisted Development:** GitHub Copilot, Claude, Windsurf, Blackbox AI, Google Antigravity
- **Cloud:** Microsoft Azure, AWS

Projects

CalmNest Bot — *Python, FastAPI, Groq (Llama 3.3 70B), SQLite, APScheduler, Telegram Webhooks* [GitHub](#)

- Designed and developed an empathetic Telegram chatbot focused on user wellbeing and conversational engagement.
- Implemented SQLite-based persistent memory for contextual interactions.
- Added scheduling for automated check-ins and reminders.
- Leveraged AI-assisted tools to improve conversational responses and debugging.
- Built safety features including rate limiting and fallback handling.

FlightsMonk — *TypeScript, Node.js, Express, React, Leaflet, Tailwind CSS, PostgreSQL, Drizzle ORM, Docker, OpenSky API* [GitHub](#)

- Developed a real-time flight tracking system using OpenSky API.
- Built backend services with Node.js and interactive UI for aircraft visualization.
- Implemented caching to optimize performance and reduce API calls.
- Used AI tools to accelerate development and improve code quality.

RepoAnt — *Go, GitHub REST API*

[GitHub](#)

- Built a Go-based CLI tool for managing GitHub repositories.
- Implemented safe deletion workflows with confirmation prompts.
- Designed features for bulk operations and improved developer productivity.

CodeMentorAI — *JavaScript, React, Vite, Node.js, Express, Google Gemini API, Monaco Editor, CSS3*

[GitHub](#)

- Developed an AI-powered coding assistant focused on guided learning.
- Designed structured workflows to help users understand concepts instead of giving direct answers.
- Built full-stack architecture for interactive problem-solving.

chat_cli — *C++17, Asio, OpenSSL/TLS, SQLite, libsodium (Argon2id), FTXUI, CMake, Docker*

[GitHub](#)

- Developed a C++ CLI chat application using TCP socket programming.
- Implemented authentication, messaging, and multi user communication.
- Integrated SQLite for persistent storage and session handling.
- Focused on performance and modular design.

Open Source Contributions

Swift Compiler

[PR Link](#)

- Fixed compiler crash related to move only enum handling.
- Improved type handling logic and added regression test.

Razorpay IFSC

[PR Link](#)

- Fixed bugs in Go and Node.js SDKs.
- Improved validation logic and documentation.

dns.toys

[PR Link](#)

- Added utilities like password generator and hashing tools.
- Fixed concurrency and validation issues.
